

Simply MIDI Interface for Diatonic Accordions

'Easy to Use' without the need for programming

This new Musictech Interface uses the well proven solid state sensors for the contacts, eliminating all the well known problems associated with springs and contact bars. This system is life-long and offers enormous reliability advantages while having no effect on the natural key sensitivity of the accordion.

CHARACTERISTICS

- **RIGHT HAND OFF**
 - **PROGRAM CHANGE UP/DOWN**
 - **MIDI Transmission channels:** RIGHT HAND - CH. 1 and 4 (pre-settable); CHORDS - CH. 2; BASS - CH. 3
1. The Right Hand (Treble) MIDI sounds can be muted by pressing **RH OFF**. The led indicator will show when the function is activated.
 2. The **PROGRAM DOWN** and **UP** keys enable the programme number to be selected by scrolling UP and DOWN with the relative keys.
